Jeff:

Attached is the draft weekend report. I left the two bullets at the top of the document for the updates we still need.

Thank you,

**Subject:** Ideas for the weekend report

Here's what we came up with ...

- Sterigenics update – I think we had something about Sterigenics in the last week or so. Otherwise, I can draft this one.
- East Chicago / USS Lead -- ATSDR to brief Mayor on blood lead study. August 18 is the ATSDR public meeting. I might need to draft this one, too, unless Rachel is back tomorrow
- Central Sands / Armenia Growers – ask Linda Holst for a couple sentences about the letter EPA and WDNR sent to Armenia Growers last week
- Parchment, Mich., update – this was in last week's report. I think the update for this week is that the city of Kalamazoo will provide drinking water for the next year. Jeff Kimble and Ralph Dollhopf are the leads in SFD.
- Franklin, Ind., update – updates here are that we've received results of air testing, the company installed a carbon filter device and there was a public meeting. Cisco can provide some more info.

I'm sure you have some questions ... we can touch base and I can provide a little more info on these.
